Volume 280, May 2001
Volume 43, May 2001

Pages E761–E769: Kevin R. Short, Jonas Nygren, Rocco Barazzoni, James Levine, and K. Sreekumaran Nair. "T_3 increases mitochondrial ATP production in oxidative muscle despite increased expression of UCP2 and -3." Page E763, first column: The published version of the manuscript contains an error in the Experimental Procedures section describing the Northern blot analysis. The primer sequences and GenBank accession numbers provided in the paper refer to the cytochrome c oxidase subunit I and III genes instead of uncoupling proteins -2 and -3. A version of the text as it presently appears and the corrected version are shown below.

Published form: Primers for the UCP2 probe corresponded to nt 6251–6274 (forward) and 6615–6635 (reverse, PCR product of 381 bp) of the rat UCP2 sequence (GenBank accession no. X14848). Primers for the UCP3 probe corresponded to nt 6251–6274 (forward) and 6615–6635 (reverse, PCR product of 381 bp) of the rat UCP3 sequence (GenBank accession no. X14848).

Correct form: Primers for the UCP2 probe corresponded to nt 467–490 (forward) and 1196–1205 (reverse, PCR product of 746 bp) of the rat UCP2 sequence (GenBank accession no. AB010743). Primers for the UCP3 probe corresponded to nt 235–254 (forward) and 980–1003 (reverse, PCR product of 768 bp) of the rat UCP3 sequence (GenBank accession no. U92069).
